DETAILED ACTION

Claim 1-19, and 24-29 are pending in the case. Receipt of the preliminary amendment on 5/15/02, the information disclosure statement on 10/4/02, is acknowledged.

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention: a method of producing a heterologous peptide, polypeptide, or protein in a lactic acid bacterium, wherein the lactic acid bacterium comprises a regulatable promoter which is regulated by a factor selected from the group consisting of pH, growth temperature, the oxygen content, a temperature shift eliciting the expression of a heat shock gene, the composition of the growth medium including the ionic strength and the NaCl content, the presence/absence of an essential cell constituent or precursors therefor, accumulation of a metabolite intracellularly or in the medium, the growth phase of the lactic acid bacterium, and the growth rate of the lactic acid bacterium.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-4 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added.

An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
